

SCIENTIFIC GAMES LAUNCHES NEXT-GENERATION *GM ATLAS*™ PROGRESSIVE SYSTEM

New Framework Provides Greater Progressive Opportunities For Table Games

LAS VEGAS, April 3, 2019 – [Scientific Games Corporation](#) (NASDAQ: SGMS) ("Scientific Games" or the "Company") recently announced the launch of [GM Atlas](#), a brand new table progressive operating system. *GM Atlas* succeeds the Company's earlier progressive systems, *Game Manager 1* and *Game Manager 2*, and ties together all of the best features from these previous platforms.

GM Atlas, Scientific Games' latest progressive operating system, provides operators with the flexibility to configure Must-Hit-By prizes, and the option to customize table signs to easily promote table game jackpot meters property-wide. This system features a convenient and easy-to-use dashboard, one-click navigation to various reports and other helpful tools, and a robust offering of live information. The *GM Atlas* enhanced progressive system also includes the upgraded [NXS Command® II](#) table game hardware, which is compatible with many generations of bet devices.

"You see a lot of companies today dabbling in the world of progressive jackpots for table games," said Roger Snow, Senior Vice President at Scientific Games. "But we've been at this for a long time, working side by side with our customers to give their customers—the players—the features they want. And *GM Atlas* is the latest and greatest example of that approach to doing business. There's beautiful signage, easy-to-use hardware and behind it all, a method to take that one wager and drive several jackpots simultaneously. It's one heck of a product."

[Soboba Casino Resort](#) in southern California was the first casino to upgrade to *GM Atlas*, across nine table games. The upgraded table progressives include *EZ Baccarat®*, *Fortune Pai Gow Poker®*, and *Multi Game Link (Ultimate Texas Hold'em® and Three Card Poker)*. Soboba is utilizing the best features from previous Scientific Games table progressive systems, including dual hot spots, single coin sensor, and the must-hit-by progressive. Although *GM Atlas* offers support for several progressive levels, Soboba will be opening with a single level progressive with mystery to support high paying jackpots as well as player bonusing.

"We are very excited to be the first casino to roll out the new *GM Atlas* progressive system. It has been a hit with the customers and gives them the opportunity for more frequent paybacks, including the must-hit-by jackpot," said Stewart Madden, Director of Table Games at Soboba Casino Resort. "We have also seen an increase in revenue as the player participation has grown, which is easy to track with the improved automated reports."

Forward-Looking Statements

In this press release, Scientific Games makes "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "will," "may," and "should." These statements are based upon management's current expectations, assumptions and estimates and are not guarantees of timing, future results or performance. Therefore, you should not rely on any of these forward-looking statements as predictions of future events. Actual results may differ materially from those contemplated in these statements due to a variety of risks and uncertainties and other factors, including those factors described in our filings with the SEC, including the Company's current reports on Form 8-K, quarterly reports on Form 10-Q and its latest annual report on Form 10-K filed with the SEC on February 28, 2019 (including under the headings "Forward-Looking Statements" and "Risk Factors"). Forward-looking statements speak only as of the date they are made and, except for Scientific Games' ongoing obligations under the U.S. federal securities laws, Scientific Games undertakes no obligation to publicly update any forward-looking statements whether as a result of new information, future events or otherwise.
