This year, we have a lot of Class II products and Class III intermixed. Class II is such an important part of Indian gaming, and we wanted to show that we have the ability to take our Class III content and port it to Class II quickly and seamlessly. We are also excited to have Monopoly Grand, a Class II game we are launching on a wide area progressive. We've heard operators say they would like to have exclusive content specifically for Class II, and so Monopoly Grand is a licensed brand unique to Class II and available on our TwinStar J43 platform. We are really excited about that.

On the Class III side, a top priority is our Wave XL, which is a beautiful cabinet featuring a stunning, curved, 49-inch 4K-resolution display. It's gorgeous and the game designers have optimized the artwork and graphics to this beautiful piece of hardware so well. That is our big unveil from a for sale perspective. We are launching this with great games like Quick Hit, Heidi's Bier Haus, Fu Dao Le and Reel Riches.

FAVORITE GAME: I'm really excited about Munchkinland on our Gamefield 2.0 platform. Many of our players are excited because it's such a great nostalgic brand. Munchkinland features beautiful graphics and many familiar bonuses players loved from the original Wizard of Oz games, but even bigger and more heightened.

We are really excited about the launch of Buffalo Xtreme on our new XT cabinet. It's the first single site progressive we're launching in Class II on our Ovation platform. Following in a few months, we'll have Timber Wolf Xtreme. Initial numbers from the launch are really positive, so there is a lot of excitement there. We're also showing some of our legacy mechanical reel products. We're moving our PBR Wide Area Progressive brand over to our Super Hits Jackpot WAP with those new titles coming out in June. We also have some new games coming up on both 5-reel and 3-reel mechanical. Our coin

collection feature is very popular on the video side, and now we're moving it over to the mechanical reel side.

We've launched three new cabinets in Class II in the last year and a half along with 80 titles and content. We're really bringing the variety that the operators have always asked for into the portfolio, both in content and hardware.

FAVORITE GAME: I'm really looking forward to the launch of Timber Wolf Xtreme, one of my favorite games on the video side. That will be coming in the next few months.

We are continuing to introduce new game content on our tablets, specifically for Indian Country. And we continue to have game content providers approach us to allow their games on our tablets. One of our new product features that we are excited about is an 80/20-split screen view so players can enjoy live-session bingo and Class II slot or video poker games at the same time. We now have three video poker games and four slot games that can be viewed and played at the same time as live-session video. We also have a new kiosk that will sell player accounts for the devices. This standalone kiosk allows players to put cash in, get an account, and register the dollars that they put into the kiosk onto a device.

FAVORITE GAME: My favorite would be the four new games that we've just introduced in our PowerPlay suite of games. These are really exciting and play in conjunction with one another. ♣
