LAS VEGAS and MACAO, May 13, 2019 /PRNewswire/ -- Scientific Games Corporation (NASDAQ: SGMS) ("Scientific Games" or the "Company") will showcase the gaming industry's most innovative products, content and technology at the *Global Gaming Expo Asia* ("G2E Asia") May 21-23 at the Venetian Macao.

Scientific Games will highlight new and innovative slot game content and platforms, proprietary table games and utilities, electronic table systems, casino management systems solutions and its new digital and global leading sports betting products – all designed to engage players, enhance operating performance and drive customer revenue.

Barry Cottle, Scientific Games President and CEO, said, "*Scientific Games is consistently looking to improve and innovate, and to deliver products that will help grow, develop and improve our customers' gaming business. This year at G2E Asia you will see how we continue to create the most dynamic games that delight our players.*"

Exciting new games

From its **slot game hardware and game content portfolio**, Scientific Games launches its newest gaming cabinet, *DUALOS™X*, with two player-favorite titles: *Duo Fu Duo Cai® 5 Treasures®* and *Diamond Eternity®*.

This new cabinet has the signature 27-27-27 look: 27" high definition LCD top, main monitor and top box for higher luminance, CPU4x processor and runs on Scientific Games' new ArgOS platform to deliver a more engaging gameplay experience.

Together with *DUALOS X*, Scientific Games will also highlight seven new games for the Asian market in the *DUALOS CABINET ON SL-V™ PLATFORM* with engaging new mechanics and features:

- *Jin Ji Bao Xi™* and *Jin Ji Bao Xi Gold Prancing Pigs™* – the third linked progressive game in the series
- *Jin Ji Bao Xi™ VIP Echo Fortunes®* and *Endless Treasure™* – standalone progressives
- *THE PINK PANTHER™ Riches of Ra®* – the third linked progressive game in the series
- *Rolling 777™* – a new standalone progressive game
- *Cash Connection® Sweet Tweet* – a new standalone progressive game

As the leading supplier of casino management systems for the Asian market, Scientific Games will highlight the industry's broadest end-to-end suite of solutions, presenting key new offerings:

Bet by Bet System

The Bet-by-Bet application is a powerful new tool that tracks all the individual bets wagered at the baccarat games. Designed for the VIP table games market, it provides a fluid solution for VIP hosts to easily track each bet in a mobile application that feeds baccarat results directly from table devices, leveraging the power of the *Shufflink®* and *TableView™* table management systems.

TableView Table Management Solution

TableView is an innovative table management solution that allows casinos to replace their existing manual rating process with the ease and simplicity of electronic automation. Casinos can create an almost paperless environment in the pit and eliminate the delay of manually entering and updating ratings into the casino management system. *TableView* is perfectly placed to enable operators to drive new innovations such as real time table data collection and anonymous tracking technologies.

Shufflink System

Shufflink creates a network and user interface that collects real time data from utility products, including shufflers, chippers, and related table peripherals for table performance analysis and player ratings. This advanced product not only provides new metrics and reports to significantly enhance a pit operation's ability to quickly identify and forecast improvement opportunities and operating constraints, but a powerful middleware data bus enabling vital live data flow into a casino data ecosystem that can be leveraged for system integrations for surveillance, security, and other applications.

iVIEW® Web Content Management

The *iVIEW 4* web-based content management solution allows for drag-and-drop content design within an exclusive web interface to create new *iVIEW* content and publish it to the casino floor. With analytics, rules, and scheduling features, the *iVIEW 4* empowers a new level of player engagement for casino marketers.

From the Company's **proprietary table games** portfolio, highlights this year will include *5 Treasures Baccarat™*, *EZ Baccarat®*, *Face Up Pai Gow Poker*, *Paris Poker*, *Blazing 7s™ Pontoon* and *Vegas Blackjack Fever*. They are also all linked via the new *GM Atlas™* jackpot system.

From its popular **electronic table games** ("ETG") portfolio, Scientific Games will display ETG products designed to maximize casino floor performance and profitability.

Making its global debut, *QUARTZ™ HYBRID* will feature prominently on a raised platform. Running on Scientific Games' exclusive operating system ArgOS, *QUARTZ™ HYBRID* will integrate with live dealers on baccarat, roulette and sic bo.

The *QUARTZ HYBRID* terminal features HD graphics on a new 1920 x 1920 screen giving players a more immersive experience. Updated content includes a new player interface that adds game statistics as well as dealer display. Players can choose to view multiple games at any one time, from single, quad to octal view. Increased connectivity allows *QUARTZ HYBRID* to connect to up to 50 individual gaming tables.

In addition, Scientific Games will showcase its innovative *Stadium Casino War™* and *Stadium Three Card Poker™*. Combining two of the most successful table games with ETG stadiums, the stadium products give the player an opportunity to play their own game on a terminal with added interactive components from a stadium environment.

Scientific Games, the global leader in **shufflers, chip sorters** and other **utility products**, showcases leading and new innovations.

- *ShuffleStar®* is a cutting-edge, low-profile front-loading shuffler that shuffles four to eight decks continuously. It is a revolutionary high-speed flat dealing shoe with sophisticated card recognition using two cameras.
- *Chipmaster-S™* is an exciting roulette product that will instantly improve game play, taking chip sorting and game security to a whole new level. Effectively and silently sorting up to 500 chips per minute, the *Chipmaster-S* delivers stacks of 20 chips right to the table surface – no mess, no hassle. There is no longer a noisy device behind the roulette table where the dealer has to dive for sorted chips. *Chipmaster-S* delivers exactly what is needed, where it's needed.
- *Safe-Shoe™*, a groundbreaking intelligent shoe with advanced technology and a compact design, features card-stop security to prevent the dealer from overdrawing and under drawing. *Safe-Shoe* can be used with any manufacturer's cards.

Full-Service, Industry-Leading Sports Betting Solutions

Scientific Games will showcase its industry-leading sports and casino technologies that bring partners to the next level. The Company will highlight its comprehensive portfolio of platforms and services that enables customers to win in both established and burgeoning markets.

Scientific Games' *OpenSports* product suite will be featured on the show floor, giving an in-depth look at the Company's player-centric sportsbook solution. Among the most reliable and scalable platforms on the market, *OpenSports* powers sportsbooks with end to end technology that includes trading, marketing and product management services, managed trading services, real-time data and pricing resources, and its Sportsbook Operations Services. A comprehensive suite of sportsbook technology and services, *OpenSports* empowers partners to choose the elements that will drive their success. The modular offering sets partners on a long-term growth trajectory by giving them the technology they need to engage players and an innovative roadmap of features that fuels continuous improvement of the operator's sportsbook.

Forward-Looking Statements

In this press release, Scientific Games makes "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "will," "may," and "should." These statements are based upon management's current expectations, assumptions and estimates and are not guarantees of timing, future results or performance. Therefore, you should not rely on any of these forward-looking statements as predictions of future events. Actual results may differ materially from those contemplated in these statements due to a variety of risks and uncertainties and other factors, including those

factors described in our filings with the SEC, including the Company's current reports on Form 8-K, quarterly reports on Form 10-Q and its latest annual report on Form 10-K filed with the SEC on February 28, 2019 (including under the headings "Forward-Looking Statements" and "Risk Factors"). Forward-looking statements speak only as of the date they are made and, except for Scientific Games' ongoing obligations under the U.S. federal securities laws, Scientific Games undertakes no obligation to publicly update any forward-looking statements whether as a result of new information, future events or otherwise.
