

## Light & Wonder to Highlight Integrated Portfolio of Slots, Tables, and Systems at G2E Asia 2026

**LAS VEGAS – May 7, 2026** – Light & Wonder, Inc. (ASX: LNW) (together with its subsidiaries, “Light & Wonder,” “L&W” or the “Company”) today announced it will showcase its latest innovations across slots, tables, and systems at G2E Asia, May 12-14 at The Venetian Macao. The Company’s diverse portfolio highlights continued investment in integrated solutions designed to support casino operators and enhance the player experience.

Making its market debut is the *COSMIC™ DUAL* cabinet, the newest addition to the globally successful *COSMIC™* hardware family. Designed with a modular approach to support global markets, *COSMIC DUAL* features dual 27-inch HD displays with a minimal bezel for a seamless content presentation, a next-generation floating *iDECK™*, and enhanced ergonomics.

"G2E Asia is a key opportunity to demonstrate the momentum behind our market-attuned content and hardware portfolio," said Siobhan Lane, CEO, Gaming at Light & Wonder. "We're focused on delivering proven-performing games and integrated solutions that support our customers' operational goals and resonate with players on the casino floor."

Across its slots portfolio, Light & Wonder will feature a mix of new and evolving titles within Stand A1003. Attendees can get a firsthand look at new titles such as *FORTUNE DOORS™*, which introduces a layered approach to the hold & spin mechanic. Making its tradeshow debut is *JOYUPI™*, which builds on the *JIN JI BAO XI™* (JJBX) series with new mechanics designed to drive player engagement. Also on display is *DRAGON TRIO™ MIDNIGHT STORM™*, which expands the *DRAGON TRIO* brand with additional bonus features and persistent elements.

In tables, the *OBSIDIAN™* cabinet and *OBSIDIAN HYBRID* platform will also be on display within L&W’s stand in both stadium and pod configurations. The *OBSIDIAN* cabinet features a 27-inch HD display with integrated lighting and supports capabilities including tournaments, multi-game functionality, and signage API integration. The *OBSIDIAN HYBRID* platform enables both automated and live dealer experiences, allowing operators to configure gameplay across multiple table formats.

Light & Wonder will also introduce *NEXLINK™*, its next-generation progressive table system. Designed to integrate with existing table infrastructure, *NEXLINK* combines updated game content with synchronized lighting and audio, enhanced bonus features, and a new backend architecture offering streamlined reporting, customizable dashboards, and data-driven insights.

Rounding out the portfolio, the Company will showcase its systems ecosystem, including

innovations that support loyalty, marketing automation, security, and operational efficiency across the casino floor.
