

Equinox™ Range Highlights SG Gaming's Breadth Across Sectors

LONDON, March 29, 2018 – Scientific Games Corporation's (NASDAQ: SGMS) ("Scientific Games" or the "Company") SG Gaming demonstrated its ongoing dedication to innovation as the business displayed its largest ever new product portfolio at the recent ICE Totally Gaming event in London. The event provided the perfect platform to introduce the industry to the breadth and depth of the new *Equinox* range for the first time, highlighting how the broad range of terminal options have been developed to meet the requirements of its customers across the LBO, arcade, bingo and casino sectors.

The real showstopper was the *Equinox MPS*, which was unveiled to customers at the show to an overwhelmingly positive response, securing a significant deal within hours of the show opening. Developed specifically for the arcade and bingo sector, the *MPS* emphasizes SG Gaming's position as leaders and innovators within community gaming. With its striking 55-inch curve feature screen and stunning 4K graphics, its stand-out appearance on the gaming floor also ensured continued success throughout the next two days.

Also leading the line-up of new hardware were the *Equinox 2.4* and *2.7* terminals, which incorporate a number of new design features developed following extensive research into player and customer requirements.

In particular, the new '*privacy mode*' tool, a unique industry innovation, demonstrated to SG Gaming customers and to the industry that this range of new terminals had been developed to offer a differentiated product, which many customers felt to have successfully addressed a growing need for increased privacy options. In addition, customers embraced the dynamic modular design of

the terminal, which offers increased flexibility and can help to reduce costs over the product's life-cycle.

The event also highlighted the progression of SG Gaming's UK casino offering through the *Riviera*[®] terminal and much anticipated addition of the *Jackpot Party*[®] *Mystery Progressive* - a significant step forward for SG Gaming's casino offering, which was launched in 2017.

Simon Johnson, Group Commercial Director at SG Gaming, said: "It's incredibly exciting to have been able to use the ICE Totally Gaming event as a platform to showcase to the industry the effort that we have gone to as a business to create a suite of innovative new products, and to demonstrate developments such as our new casino progressive.

"Our team has worked extremely hard for the past year to introduce this new product range, so receiving such positive feedback from our customers is very encouraging, and really is testament to all the hard work our teams have put in.

We're thrilled to have presented both our new content and our omni-channel focused games, such as *The Legend of Bigfoot*[®] and *Rainbow Riches Fortune Favours*[®], alongside our Digital division. This is integral to our customer strategy and continues to be a key focus of what we deliver.

"I'm particularly looking forward to providing our casino customers with the new *Jackpot Party Progressive*, many of whom will start to see the product introduced from March onwards this year. We look forward to continuing the success of ICE throughout this year via our new product and content initiatives, as well as our continued efforts to drive innovation which we believe will enhance performance for our customers."
